

Foundational Education Module 0 (FEM0): Structural Health Monitoring Education Unit

Your assignment...

(1) Answer the following question. Save a copy of your response for discussion in a subsequent class period.

List the criteria, in order of importance, which you believe should be used to determine if a bridge should be monitored with a Structural Health Monitoring System. Be prepared to justify your criteria and their order of importance.

(2) List any questions you might have concerning SHM in general, the SHM Education Unit and your responsibilities.
